

Instructions for the poster session visitors

We are delighted to welcome you to our virtual reality poster session. For the most comfortable participation, we suggest that you familiarize yourself with our short instructions for visiting virtual reality.

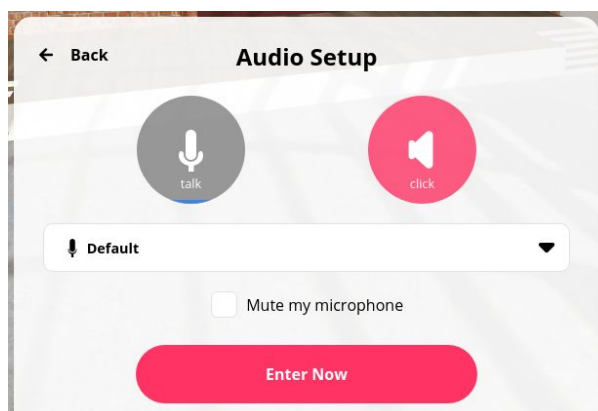

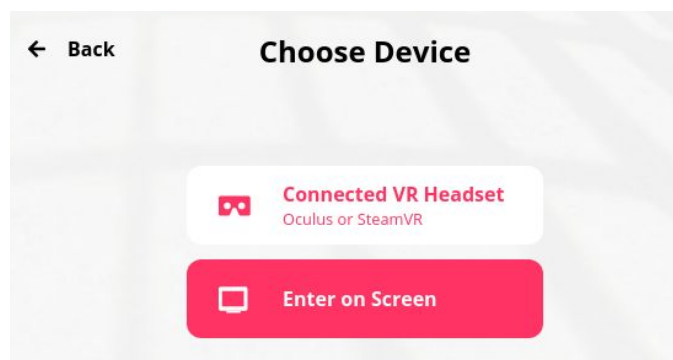

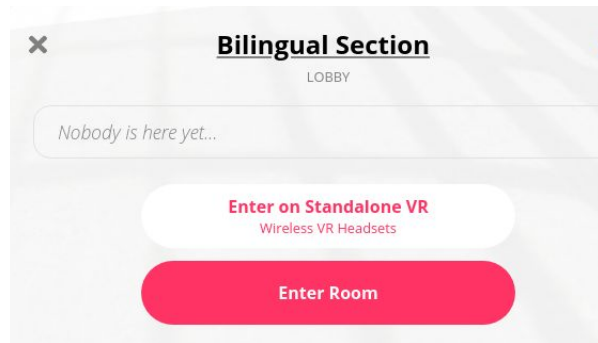

To participate, you can use virtual reality glasses, but if you do not have this, then a regular computer with a microphone will also cope.

To begin with, you will be offered to call your name and to choose an avatar, which can be any from the presented collection:

Then you need to press the button to enter the room, to choose your device (for the PC you should click on “Enter on Screen”), and give permission to use the microphone (if you want to):

Moving around the hall can be done in two modes:

"AWSD" - walking

"EQ" - turns right-left

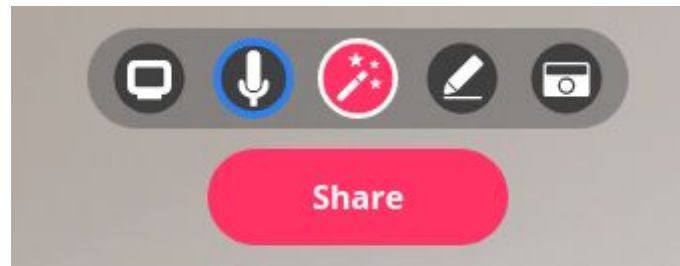

"G" - turn on and off the flight mode

Also you can turn with your mouse by holding down the left mouse button.

Clicking the right mouse button allows you to view in detail an object (for example, a map or a list of participants on the wall).

For detailed viewing of posters, we recommend using flight mode with navigation using the left mouse button.

Also you can take pictures in the photo zone. To do this, you need to click on the pink camera icon at the top of the screen.

Most popular problems:

1. The link isn't working.

Please reload the tab and be patient.

2. I can't read the posters

- use the flight mode
- right click on the poster
- press the space and then click on the "open link" button
